Restriction/Election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 are drawn to a method for reducing inflammation in a tissue of a mammal class 435, subclass 7.1.

Group I encompasses the following species: TF antagonist; an antibody and TNF inhibitor. Applicant is required to make an election of one the above for examination on the merits. In addition, the claims are directed to a therapeutic regimen for several different diseases or disorders. Applicant is required to make an election of a specific one. This is a species election.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 1656

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
